

Viewing Signature Engine Settings

The signature button object that should be imported to configure for digital signatures contains the settings found by following the steps below.

1. Double click the signature button object to view the *Properties* dialog box
2. Click the **Details** button to open *Signature Action Details* dialog box
3. Click the **Signature Engine Settings** tab

4. Click **Cancel** to return to the Properties dialog box
5. Click **Cancel** to return to the Designer window
